Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

La Bandini si riserva in diritto, ogni qualvolta si rendesse necessario, di apportare modifiche tecniche ed estetiche senza obbligo di preavviso.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Bandini reserves the right, whenever necessary, to make technical and aesthetic modifications without prior warning.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Bandini hat das Recht sich aestetische und technische Änderungen vorzunehmen wo sie nötig sind ohne vorzeitig zu informieren.

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

La Bandini se reserva el derecho, cada vez que fuese necesario, de aportar modificaciones técnicas y estéticas sin obligación de previo aviso.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Bandini se réserve le droit, chaque fois que cela est nécessaire, d'apporter des modifications techniques et esthétiques sans obligation de préavis.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

La Bandini si riserva in diritto, ogni qualvolta si rendesse necessario, di apportare modifiche tecniche ed estetiche senza obbligo di preavviso.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Cartuccia deviatore 4 vie

Cartridge for 4-way diverter

Kartusche für 4-Wege Umsteller

Cartucho para desviador con 4 salidas

Cartouche pour inverseur à 4 sorties

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

La Bandini si riserva in diritto, ogni qualvolta si rendesse necessario, di apportare modifiche tecniche ed estetiche senza obbligo di preavviso.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Note:
La Bandini consiglia l'installazione di rubinetti filtro ispezionabili sulle due mandate per trattenere eventuali corpi estranei che potrebbero danneggiare gli organi di tenuta.

Note:
Bandini advises installation of filters that can be inspected on both delivery circuits so as to trap foreign bodies that might damage seals/gaskets etc.

Empfehlung:
Bandini empfiehlt den Einbau von Eckventilen mit Filter, als Schutzmaß die Dichtungen und Kartusche beschädigen könnten gegen Fremdkoerpern

Notas:
Bandini aconseja la instalación de grifos filtro inspeccionables de las dos descargas para retener eventuales cuerpos extraños que podrían dañar los elementos de estanqueidad.

Remarque:
Bandini recommande l'installation de robinets disposant de filtres démontables sur les deux sorties afin de retenir d'éventuels corps étrangers qui pourraient nuire à l'étanchéité.

Garanzia prodotti

Warranty - Garantie - Garantiá - Garantie

I prodotti Bandini, rigorosamente collaudati prima di essere posti in vendita, sono garantiti da difetti di fabbricazione per un periodo di 10 anni per le finiture cromo e zirconio e di 2 anni per tutte le altre finiture a partire dalla data di acquisto (farà fede la data della ricevuta di acquisto). L'usura delle cartucce ceramiche nei miscelatori monocomando, dei vitoni tradizionali e dei vitoni ceramici dipende dalla qualità dell'acqua: Bandini garantisce queste parti per 5 anni quando siano stati installati i rubinetti sottolavabo, vengano rispettati i valori di pressione di alimentazione consigliati e l'acqua presenti dei valori di durezza medi.

La garanzia comprende difetti di fusione, difetti di porosità e difetti di cromatura e consiste nella riparazione del pezzo riscontrato difettoso dopo la verifica da parte di Bandini e dietro presentazione della ricevuta d'acquisto.

La garanzia decade nel caso si riscontri:
• Deterioramento delle superfici cromate dovuto all'uso di prodotti per la pulizia contenenti acidi o sostanze abrasive.
• Deterioramento delle superfici con finiture diverse da quelle cromate. La loro durata è infatti subordinata alla cura ed alla delicatezza d'uso da parte dell'utente.
• Deterioramento della rubinetteria imputabile ad installazione effettuata in modo non corretto.
• Utilizzo della rubinetteria in modo non corretto.
• Riparazione e manutenzione effettuate in modo non idoneo e senza preventiva autorizzazione dell'Azienda.

La garanzia non include le spese di manodopera per la sostituzione dei pezzi difettosi, ne la richiesta di risarcimenti per danni diretti od indiretti subiti od insorti.
La garanzia Bandini non è rinnovabile.

All Bandini products are carefully tested before they are put on sale. Chrome and zirconium-finish products are guaranteed against production defects for 10 years while products with other finishes are guaranteed for 2 years as from the date of purchase date (as proven by receipt of payment). Wear on ceramic cartridges in single-lever mixers, traditional large screws and ceramic large screws depends on the quality of the water. Bandini guarantees these components for 5 years where a beneath-basin filter cock has been installed and where recommended water supply pressure is observed and water is of medium hardness.

The warranty covers casting defects, porosity defects and chrome-plating defects. We will repair or replace the faulty piece after examination and upon production of the receipt to confirm the purchase date.

The warranty does not apply to damage resulting from:
• Deterioration of chrome surfaces caused by the use of acid or abrasive cleaning products.
• Deterioration of surfaces with finishes other than chrome. Their lifespan depends on the care taken by the user.
• Improper installation.
• Improper use.
• Repair and maintenance carried out under unsuitable circumstances and without prior authorisation from Bandini.

The warranty does not include the labour charges incurred in replacing the faulty pieces, nor any claims for direct or indirect, damages suffered or arisen.
The Bandini warranty cannot be renewed.

Alle BANDINI Produkte werden geprüft bevor sie in den Verkauf kommen. Chrom- und Zirkoniumbeschichtete Produkte haben 10 Jahre Garantie für Produktionsfehler, während Produkte mit anderen Farbbeschichtungsoberflächen 2 Jahr Garantie ab dem Verkaufsdatum haben (RECHNUNGSDATUM).
BANDINI gibt 5 Jahre Garantie auf die Keramikkartuschen sowie Keramikoberteile, wenn die Installation nach DIN 1988, Hauswasserstation eingebaut sind oder zu diesem Zeitpunkt nachweislich Installiert wurde
Ein Wasserversorgungsdruck von 3,8 Bar darf nicht überschritten werden.
Eine Wasserqualität mittlere Härte ist noch vertretbar Härtebereich 3.

Die Garantie bezieht sich auf Defekte, Porosität und Verchromungsdefekte. BANDINI wird das fehlerhafte Stück nach Prüfung des Sachverhaltes gegebenenfalls ersetzen, wobei das Rechnungsdatum mit berücksichtigt wird.

Die Garantie schließt folgendes nicht ein:
BANDINI Armaturen müsse durch einen Fachhandwerker installiert werden.
• Beschädigung von Chrom- und Zirkonium Oberflächen, die durch die Verwendung von Säure oder Scheuermitteln bei der Reinigung verursacht wurden
• Beschädigung von Farbbeschichtungsoberflächen, verursacht durch die Verwendung von Säure oder Scheuermitteln bei der Reinigung.
• Fehlerhafte Installation
• Unzeckmäßige Verwendung.
• Reparatur durch nicht ausdrücklich autorisierten Fachhandwerksbetrieb von BANDINI

Die Garantie schließt die Arbeitskosten nicht ein, die zum Ersetzen der fehlerhaften Stücke anfallen, ebenso irgendwelche Behauptungen für direkt oder indirekt erlittenen Schäden, die entstanden sein sollen
Die BANDINI Garantie kann nicht verlängert werden.

Los productos BANDINI, probados rigurosamente antes de ser puestos a la venta, están garantizados para defectos de fabricación durante un periodo de 10 años, para los acabados cromo y circonio y durante 2 años para los demás acabados a partir de la fecha de adquisición (dará fe de ello la fecha del recibo de compra). El desgaste de los cartuchos cerámicos en los mezcladores monomando, de las roscas de extrusión tradicionales y de las roscas de extrusión cerámicas, depende de la calidad del agua: Bandini garantiza estas partes durante, por lo menos, 5 años cuando se hayan instalado los grifos bajo lavabo, se respeten los valores de presión de alimentación aconsejados y el agua presente valores de dureza medios.

La garantía comprende defectos de fusión, defectos de porosidad y defectos de cromado y consiste en la reparación de la pieza defectuosa después de la verificación por parte de Bandini y tras presentación del recibo de adquisición.

La garantía se invalida en caso que se detecte:
• Deterioro de las superficies cromadas debido a la utilización de productos para la limpieza que contengan ácidos o sustancias abrasivas.
• Deterioro de las superficies con acabados diversos de aquellas cromadas. Su duración está, de hecho, subordinada al cuidado y a la delicadeza de utilización por parte del usuario.
• Deterioro de la grifería imputable a instalación efectuada de modo incorrecto.
• Utilización incorrecta de la grifería.
• Reparación y mantenimiento efectuados de modo inadecuado y sin previa autorización de la empresa.

La garantía no incluye los gastos de mano de obra para la sustitución de las piezas defectuosas, ni la petición de indemnizaciones por daños directos o indirectos sufridos o surgidos.

La garantía Bandini no es renovable.

Les produits Bandini sont testés rigoureusement avant leur mise en marché et sont garantis pendant 10 ans pour les finitions chrome et zirconium et de 2 ans pour toutes les autres finitions et ce à compter du jour d'achat (la date figurant sur le ticket d'achat faisant foi). L'usure des cartouches en céramique des mitigeurs, des cartouches traditionnelles et des cartouches en céramiques dépend de la qualité de l'eau : Bandini les garantira pendant 5 ans à condition que des valves d'arrêt de l'eau sous le lavabo aient été installées, que les valeurs de pression d'alimentation conseillées ont bien été respectées et que le niveau de dureté de l'eau est moyen.
La garantie couvre les défauts de fabrication, défaut de porosité et défaut de chromage et comprend la réparation de la pièce défectueuse après vérification de la société Bandini et sous présentation du ticket d'achat.

La garantie s'éteint dans les cas suivants :
• Détérioration des superficies chromées suite à l'utilisation de produits de nettoyage contenant de l'acide ou des substances abrasives.
• Détérioration des superficies autres que chromées. Leur durée de vie étant subordonnée aux soins et à la délicatesse avec laquelle les équipements sont utilisés.
• Détérioration de la robinetterie imputable à une installation incorrecte.
• Utilisation non appropriée de la robinetterie.
• Réparation et entretien non adapté et sans autorisation préalable de la société constructrice.

La garantie n'inclue pas les frais de main d'oeuvre pour le remplacement des pièces défectueuses ni la demande de dédommagement pour les dommages directs ou indirects subis ou occasionnés.

La garantie Bandini n'est pas renouvelable.

Manutenzione prodotti

Maintenance - Wartung - Mantenimiento - Entretien

Oggi la rubinetteria moderna dei sanitari, della cucina e delle docce, è prodotta con materiali molto differenti per soddisfare la richiesta del mercato riguardo al design ed alla funzionalità.
Per evitare danni e reclami si devono considerare alcuni criteri durante l'uso e la pulizia dopo l'uso.

Prodotti di pulizia per rubinetteria e docce
Gli acidi sono indispensabili come parte dei prodotti per la pulizia che eliminano forti depositi di calcare. Nella cura della rubinetteria e delle docce si devono considerare i seguenti punti:
• Utilizzare soltanto i prodotti di pulizia che sono destinati per il tipo di pulizia richiesto.
• Non utilizzare pulitori che contengano acido cloridrico, acido formico oppure acido acetico, perché questi possono creare gravi danni.
• Non utilizzare pulitori contenenti acido fosforico dove non indicato.
• Non utilizzare pulitori contenenti soluzioni cloridriche
• Non utilizzare mai miscele di diversi pulitori
• Non utilizzare prodotti abrasivi, come polveri abrasive, spugne e panni in microfibra.

Istruzioni per la pulizia della rubinetteria e delle docce
Seguire sempre le istruzioni d'uso dei produttori e dei mezzi di pulizia.
In generale:
• Pulire la rubinetteria e le docce solo quando necessario.
• Adattare le dosi del pulitore ed il tempo d'azione alle caratteristiche del prodotto e non lasciare mai agire il pulitore più del necessario.
• Evitare i depositi del calcare con la pulizia periodica.
• Non spruzzare mai il pulitore direttamente sulla rubinetteria, ma su un panno oppure una spugna, perché parte degli spruzzi possono infiltrarsi nelle aperture della rubinetteria e causare dei danni.
• Dopo la pulizia sciacquare bene con acqua per eliminare definitivamente i residui del prodotto di pulizia.

Avvisi importanti
Residui di creme, saponi, shampoo e gel doccia possono causare dei danni. Anche qui vale: dopo l'uso sciacquare bene con acqua per eliminare detti residui.
Nelle superfici già danneggiate l'azione del prodotto di pulizia aumenta la progressione dei danni.

Danni a causa di trattamenti impropri non sono coperti dalla nostra garanzia.

Modern sanitary tapware, kitchen mixers and showers consist of very different materials in order to meet the needs of the market with regard to design and functionality.
To avoid damages/claims it is necessary to consider certain criteria when cleaning.

Cleaning materials for taps and showers
Acids are necessary ingredients of cleaning materials as they remove lime. However, note the following points when cleaning mixers and showers:
• Only use cleaning materials explicitly intended for this type of application.
• Never use cleaning materials containing hydrochloric, formic or acetic acid, as they can cause considerable damage.
• Do not use materials containing phosphoric acid unless explicitly indicated.
• Never mix different cleaning materials together.
• Never use cleaning materials or appliances with an abrasive effect, such as unsuitable cleaning powders, sponge pads or micro fibre cloths.

Cleaning instructions for taps and shower
Please follow the cleaning material manufacturer's instructions. In addition observe the following:
• Clean mixers and shower as and when required.
• Use cleaning materials in doses that are suitable for the product and apply them for an appropriate length of time: do not let the cleaning material act on the product any longer than is necessary.
• Regular cleaning can prevent calcification.
• When using spray cleaners, spray first into a cloth or sponge, never directly into the sanitary tapware, as drops could enter openings and gaps and cause damage.
• After cleaning rinse thoroughly with clean water to remove any cleaning material residue.

Important
Residue from liquid soaps, shampoos and shower foam can also cause damage, so rinse with clean water after use.
If the surface is already damaged, the effect of cleaning materials will cause further damage.

Damage caused by improper treatment shall not be covered by our warranty.

Moderne Sanitärartikel werden aus unterschiedlichen Materialien hergestellt, um den Bedürfnissen des Marktes in Hinsicht auf Design und Funktionalität zu entsprechen.
Um Beanstandungen und Reklamationen zu vermeiden, ist es notwendig bestimmte Kriterien bei der Pflege zu beachten.

Reinigung von Sanitärarmaturen und Produkten
Säuren sind notwendige Bestandteile zum Reinigen von Sanitärmaterialien, da sie Kalk entfernen. Aber es ist folgendes zu beachten:
• Benutzen Sie Reinigungsmittel die eine neutrale Zusammensetzung haben, z.B. Neutralreiniger und Mikrofasertuch.
• Benutzen Sie keine Reiniger, die Salz, Ameisensäure, Phosphorsäure oder Essigsäure enthalten, da diese beträchtlichen Schaden verursachen können.
• Keine Scheuermittel oder dergleichen.
• Mischen Sie keine Reinigungsmittel zusammen.
• Benutzen Sie keine Reinigungsgegenstände mit ungeeigneter Oberfläche, Tücher mit rauer Oberfläche oder Scheuerschwämme, oder der Gleichen.

Pflege von Sanitärarmaturen und Produkten
Folgen Sie den Anweisungen des Herstellers des Reinigungsmittels. Beachten Sie außerdem folgende Punkte:
• Reinigen Sie die Sanitärarmaturen und Produkte nur bei Notwendigkeit.
• Beachten Sie bitte die Einwirkungszeit des Reinigungsmittels, und lassen Sie es nie länger als unbedingt notwendig einwirken, da es sonst Schäden verursachen kann.
• Durch sofortiges Abtrocknen nach Benutzung können Kalkablagerungen erheblich verhindern werden.
• Wenn Sie Sprühreiniger benutzen, sprühen Sie zuerst auf das Reinigungstuch und wischen dann ab, nie direkt auf die Sanitärarmaturen oder Produkte, da manche Reinigungsmittel dadurch Schäden an Dichtungen verursachen könnten.
• Nach dem Reinigen immer gründlich mit sauberem Wasser nachspülen und trocken wischen, um etwaige Rückstände von Reinigungsmitteln zu entfernen.

Wichtig
Rückstände von flüssiger Seife, Shampoos und Duschschaum können auch Schäden verursachen, spülen Sie deshalb immer mit sauberem Wasser nach Benutzung nach.
Wenn die Oberfläche schon beschädigt ist, wird durch die Wirkung der Reiniger weiterer Schaden verursacht.

SCHÄDEN DIE VON FALSCHER PFLEGE ODER INSTALLATION VERURSACHT WURDEN, SIND VON UNSERER GARANTIE AUSGESCHLOSSEN

Actualmente, la grifería moderna de los sanitarios, de la cocina y de las duchas, se produce con materiales muy diferentes para satisfacer la demanda del mercado por lo que se refiere a diseño y funcionalidad.
Para evitar daños o reclamaciones, deben tenerse en cuenta algunos criterios durante la utilización y la limpieza después del uso.

Productos de limpieza para grifería y duchas
Los ácidos son indispensables como parte de los productos para la limpieza que eliminan fuertes depósitos de cal. Para el cuidado de la grifería y de las duchas deben tenerse en uenta los siguientes puntos:
- Utilizar sólo aquellos productos de limpieza que están destinados para el tipo de limpieza requerido.
- No utilizar limpiadores que contengan ácido clorhídrico, ácido fórmico o ácido acético, porque éstos pueden causar graves daños.
- No utilizar limpiadores que contegan ácido fosfórico donde no esté indicado.
- No utilizar limpiadores que contengan soluciones clorhídricas.
- No utilizar jamás mezclas de diferentes limpiadores.
- No utilizar productos abrasivos, como polvos abrasivos, esponjas o paños de microfibra.

Instrucciones para la limpieza de la grifería y de las duchas
Seguir siempre las instrucciones de uso de los fabricantes y medios de limpieza.
En general:
- Limpiar la grifería y las duchas sólo cuando sea necesario.
- Adaptar las dosis del limpiador y el tiempo de acción a las características del producto y no dejar actuar el limpiador más de lo necesario.
- Evitar los depósitos de cal con la limpieza periódica.
- No pulverizar jamás el limpiador directamente en la grifería, hacerlo en un paño o esponja porque parte de la pulverización puede infiltrarse en las aperturas de la grifería y causar daños.
- Después de la limpieza, enjuagar bien con agua para eliminar definitivamente los restos del producto de limpieza.

Avisos importantes
Restos de cremas, jabones, champú y gel de ducha pueden causar daños. En este caso: después de la utilización enjuagar bien con agua para eliminar dichos restos.
En las superficies ya dañadas la acción del producto de limpieza aumenta la progresión de los daños.

Daños a causa de tratamientos inadecuados no están cubiertos por nuestra garantía.

Aujourd'hui la robinetterie moderne destinée aux sanitaires, à la cuisine et aux douches, est fabriquée dans des matériaux très différents afin de répondre la demande de design et de fonctionnalité du marché.
Afin d'éviter tout dommage ou réclamation, il faut prendre certains critères en considération pendant l'utilisation et le nettoyage après utilisation.

Produits de nettoyage pour robinetterie et douche
Les produits à base d'acide sont admis dans les produits pour le nettoyage puisqu'ils permettent d'éliminer des dépôts de calcaire importants.
Dans l'entretien de la robinetterie et des douches il faut se rappeler les points suivants :
N'utiliser que les produits d'entretien qui sont conseillés pour le type d'utilisation souhaité.
Ne pas utiliser de nettoyants qui contiennent de l'acide chlorhydrique, de l'acide formique ou de l'acide acétique car ils peuvent causer des dommages importants.
Ne pas utiliser de nettoyants contenant de l'acide phosphorique lorsque cela n'est pas indiqué.
Ne pas utiliser de nettoyants contenant des solutions chlorhydriques.
Ne jamais utiliser de mélange de certains de ces produits.
Ne pas utiliser de produits abrasifs, tels que des poudres abrasives, des éponges ou des chiffons en microfibres.

Instructions pour le nettoyage de la robinetterie et de la douche
Toujours suivre les instructions d'utilisation des produits et des moyens de nettoyage.
En général :
Ne nettoyer la robinetterie que lorsque cela est nécessaire.
Adapter les doses de nettoyant et les temps d'action aux caractéristiques du produit et ne jamais laisser agir plus longtemps que la durée conseillée.
Prévenir les dépôts de calcaire importants par un nettoyage régulier.
Ne jamais vaporiser directement le nettoyant sur la robinetterie, mais sur un chiffon ou une éponge, car le nettoyant pourrait s'infiltrer dans les ouvertures de la robinetterie et entraîner des dommages.
Bien rincer avec de l'eau après le nettoyage afin d'éliminer définitivement tous les résidus de nettoyants.

Recommandations importantes
Les résidus de crème, de savon, de shampooing et de gel douche peuvent entraîner des dommages. Il faut rincer soigneusement avec de l'eau après chaque utilisation.
Sur les superficies déjà abîmées, l'action du produit de nettoyage va augmenter le développement de ces parties endommagées.

Les dommages résultant de traitements impropres ne sont pas couverts pas notre garantie.

"RUBINETTO VERDE®"

DANMARK
VA 1.42/14506-14511

Certificazione Rubinetto Verde

I rubinetti Bandini offrono da sempre qualità, tecnologia, design, e contribuiscono a migliorare la salute.

Perché sono sottoposti al sistema Ruveco ©**, un trattamento che elimina il piombo dalla superficie delle parti in ottone del rubinetto. I test di controllo*** sull'acqua prelevata dai rubinetti trattati con il sistema Ruveco © hanno dimostrato un rilascio di piombo ben al di sotto di 10 microgrammi/litro (la soglia massima consigliata dall'OMS). Un risultato eccezionale, soprattutto se confrontato con quello dei rubinetti non trattati. Questi infatti rilasciano il piombo nella quantità di 100-120 microgrammi/litro.

Bandini Rubinetterie è tra le prime aziende in Europa ad utilizzare il trattamento, per offrire prodotti sicuri e all'avanguardia, ed è la prima azienda in Italia ad applicare il processo Ruveco © di depiombatura sistematicamente su tutti i prodotti*.

* Solo quelli con apposito logo.
** Brevettato in Italia dal laboratorio di Ricerca e Sviluppo "Ruvaris", specializzato nello studio di nuove tecnologie da applicare a valvole e rubinetti.
*** Test effettuati dal laboratorio Ruvaris.

Environmentally Friendly Taps Certification

Bandini Rubinetterie has always offered you quality, technology and design. Now, Bandini taps take care of your health too! This is because Bandini has introduced the Ruveco© ** process into its production system. This process removes lead from the brass surfaces of the tap. Tests *** on water drawn from Bandini taps show lead concentrations to be lower than 10 micrograms/litre (well below the maximum threshold recommended by WHO). An excellent result, then, especially when compared to results obtained with untreated taps, which release lead concentrations of between 100 and 120 micrograms/litre!

Bandini Rubinetterie prides itself on offering customers products that are safe and reliable: it should thus come as no surprise that Bandini was one of the first European firms to adopt the process and the first in Italy to systematically apply the Ruveco© process to all its products*.

* Only those with our green tap logo.
** Patented in Italy by the "RUVARIS" Research & Development laboratory, a specialist in new technologies applicable to valves and taps.
*** Tests made in the Ruvaris laboratory.

Bescheinigung Grüne-armatur

Die Bandini-Armaturen zeichnen sich seit jeher durch hohe Qualität, ausgereifte Technologie und ansprechendes Design aus. Außerdem schützen sie ihre Gesundheit, da unsere Armaturen dem Ruveco-System©** unterzogen werden. Hierbei handelt es sich um ein Behandlungsverfahren, durch welches das Blei, das sich auf der Oberfläche der Messingteile der Armatur befindet, entfernt wird. Kontrolltests*** mit Wasser, das an den mit dem Ruveco-System© behandelten Armaturen entnommen wurde, haben bewiesen, dass eine Bleiabgabe festgestellt werden kann, die weit unter 10 Mikrogramm/Liter liegt (von OMS empfohlener Höchstgrenzwert). Ein einzigartiges Ergebnis, vor allem im Vergleich zu nicht behandelten Armaturen, bei denen sich eine Bleiabgabe in Höhe von 100-120 Mikrogramm/Liter feststellen lässt.

Bandini-Armaturen zählt mit zu den ersten Unternehmen Europas, die dieses Behandlungsverfahrens anwenden, denn wir möchten unseren Kunden stets sichere und fortschrittliche Produkte auf dem neuesten Stand bieten. Bandini-Armaturen ist das erste Unternehmen in Italien, das den Ruveco©-Bleientzugsprozess systematisch an allen seinen Produkte anwendet*.

* Nur die mit dem entsprechenden Markenzeichen versehenen Produkte.
** In Italien durch das Forschungs und Entwicklungslabor "Ruvaris" patentiert, das auf die Untersuchung neuer Technologien spezialisiert ist, die sich an Ventilen und Armaturen anwenden lassen.
*** Vom Ruvaris-Labor ausgeführte Tests.

Certificación Grifo Verde

Los grifos Bandini te ofrecen siempre calidad, tecnología, diseño.

Contribuyen a mejorar tu salud porque han sido sometidos al sistema Ruveco ©**, un tratamiento que elimina el plomo de la superficie de las partes de latón del grifo. Los tests de control *** en el agua obtenida de los grifos tratados con el sistema Ruveco ©, han demostrado un residuo de plomo muy por debajo de los 10 microgramos/litro (el límite máximo aconsejado por la OMS). Un resultado excepcional, sobretodo si se compara con el de los grifos no tratados. Éstos, de hecho, dejan un residuo de plomo de 100-120 microgramos/litro.

Bandini Rubinetterie se encuentra entre las primeras empresas de Europa que utiliza el tratamiento, para ofrecer a los propios clientes productos seguros y de vanguardia. Bandini Rubinetterie es la primera empresa de Italia que aplica el proceso Ruveco© para la eliminación del plomo, sistemáticamente en todos los productos*.

* Sólo aquellos con pertinente logotipo.
** Patentado en Italia por el laboratorio de Investigación y Desarrollo “Ruvaris”, especializado en el estudio de nuevas tecnologías a aplicar a válvulas y grifos.
*** Tests efectuados por el laboratorio Ruvaris.

Certification “Robinet Vert”

Les robinets Bandini offrent depuis toujours qualité, technologie et design. Ils contribuent à préserver votre santé, parce qu’ils sont soumis au système Ruveco ©** un traitement qui élimine le plomb de la superficie des parties en cuivre du robinet. Les tests de contrôle*** sur l’eau prélevée des robinets traités avec le système Ruveco© ont démontré une présence de plomb bien inférieure à 10 micro grammes/litre (seuil maximal conseillé par l’OMS). Un résultat exceptionnel, d’autant plus lorsqu’on le compare à celui des robinets non traités. Ces derniers, libèrent en effet, une quantité de plomb égale à 100-120 micro grammes/litre.

Bandini Robinetteries figure parmi les premières sociétés en Europe qui utilisent ce traitement, afin de proposer à ses clients, des produits sûrs et à l’avant-garde. Bandini Robinetteries est le premier fabricant en Italie à appliquer systématiquement le procédé de déplombage Ruveco© sur tous les produits*.

* Seulement ceux qui présentent le logo spécifique.
** Breveté en Italie par le laboratoire de Recherche et de Développement “Ruvaris”, spécialisé dans l’étude des nouvelles technologies à appliquer aux vannes et robinets.
*** Tests effectués par le laboratoire Ruvaris.
